

TRACER (S1415CD) NEWSLETTER

September 2017

STUDY UPDATES

- ✦ TrACER has been open to accrual for one year!
- ✦ As of 9/11/17, we have **834 patients registered across 38 components** (12 out of 13 Cohort components, 7 out of 8 Usual Care components, 9 out of 12 Intervention Arm 3 components, and 10 out of 12 Intervention Arm 4 components).
- ✦ As of 9/11/17, **22 of our 24 intervention components** have completed their order change process and are open for enrollment.

TrACER: A Pragmatic Trial Assessing CSF Prescribing Effectiveness and Risk

This pragmatic trial is designed to test an intervention to increase compliance with guidelines, and generate evidence to assess effectiveness of Primary Prophylactic CSF (PP-CSF) on reducing rates of FN for patients receiving intermediate-risk chemotherapy regimens. TrACER is the first trial of its kind and is sponsored by SWOG, a part of the National Clinical Trials Network. The trial is led by Dr. Scott Ramsey at HICOR and funded in part by PCORI.

CONGRATULATIONS AND THANK YOU TO...

The following site(s) for enrolling their first patient as of 9/11/17:

- ★ LSU Health Sciences Center - New Orleans in New Orleans, LA

The following site(s) for completing 90% of their total enrollment:

- ★ Novant Health Forsyth Medical Center in Winston-Salem, NC

The following site(s) for completing 75% of their total enrollment:

- ★ Illinois CancerCare - Peoria in Peoria, IL

REMINDERS - FORMS

Discontinuation of Initial Systemic Therapy Form

- ✦ Note that the **S1415CD Discontinuation of Initial Systemic Therapy** form has two parts in Rave. Please remember to fill out part two of the form.

Six Month Forms

- ✦ Section 14.4d of the protocol indicates that the **S1415CD Use and Copayment Survey** can be submitted before six months. This is the only form due at six months that may be submitted early. The other forms due at six months should be submitted within 14 days after six months post-registration.
